# Karbyon

## Microencapsulated Fungicide

Karbyon is a new generation of microencapsulated fungicides from BioStart. The unique encapsulation technology enables the fungicide to work fast, effectively controlling Powdery Mildew and Sooty Mould on a variety of crops.

### DIRECTIONS FOR USE:

#### POWDERY MILDEW

Crop	Application rate: Apply at 10-15 day intervals
Grapes, Citrus and Ornamentals	2.5kg-5kg/ha diluted at 1:100
Berries	3kg/ha diluted at 1: 100
Vegetables and Cereals	3kg – 5kg/ha diluted at 1:100

#### SOOTY MOULD

Crop	Application rate: Apply at 10-15 day intervals
Citrus	2.5kg-5kg/ha diluted at 1:100

#### High disease pressure or severe infection:

Apply at 7-10 day intervals until disease is controlled.

**Timing:** Apply to new growth when infections occur or if conditions favour disease.

Ensure good spray coverage to run-off for optimal disease control. Sprayers should be calibrated before use.

**Withholding period:** DO NOT apply within 7 days of harvest.

**Restraints:** DO NOT spray under conditions that give slow drying i.e. high humidity, cool temperatures. DO NOT spray early morning, late evening, or during the hours of darkness. These conditions may give rise to phytotoxic damage to plant or fruit. DO NOT spray plants under stress from wet or dry conditions.

Refer to label for further instructions.

Available in pack sizes: 5kg & 20kg
