BOOST RUMEN FUNCTION

BioStart Ruminant is a prebiotic digestion enhancer formulated to give stock a boost at important times such as weaning, pre-tup and at feed changes.

BioStart Ruminant is powered by signal molecule technology. Ruminant contains a concentrated blend of enzymes and secondary metabolites from the fermentation of *Lactobacillus acidophilus*, *Bifidobacterium* & *Streptococcus thermophilus*. BioStart Ruminant aids in maintaining efficient rumen function through periods of stress such as weaning, transport and feed changes.

- **Increases digestive efficiency**
- **Reduces feed change stress**
- **Reduces weaning stress**

Directions for use:

Lambs: 4ml/head at weaning and prior to feed changes and transport

Ewes/Hoggets/Rams/Merinos: 4ml/head prior to feed changes, mating and transport

Calves: 10ml/head at weaning and prior to feed changes and transport

Cattle: 20ml/head prior to feed changes, mating and transport

Pack sizes available: 2, 5, 10 and 20 litre
