**ThatchBusta™** contains a blend of fermentation extracts and nutrients that activate beneficial microbes to convert thatch into humus and promote clover growth.

ThatchBusta™ helps improve soil aggregation, soil moisture holding capacity and nutrient mineralisation. ThatchBusta™ promotes clover germination and root penetration, for increased clover content in your pasture and improved pasture quality.

**DIRECTIONS FOR USE**

Reduce Thatch & Promote clover growth	Timing	Application Rate	Comments
<b>Land preparation for cropping</b> - prior to direct drilling or cultivation	<b>Autumn</b>	<b>3 L/ha</b>	<b>Ground spray</b> 6 months prior to spring sowing. Minimum water rate is 200 L/ha.
<b>Improve pasture</b> - ThatchBusta™ with chemical topping	<b>Spring</b> Soil temperature 10°C and rising	<b>3 L/ha</b>	<b>Aerial spray:</b> Apply ThatchBusta™ with chemical topping. Call BioStart NZ 0800 116 229 or Aust. 1800 359 559 for advice on rate. Minimum water rate is 40 L/ha. Paddocks will yellow for approximately 4 weeks.

**Application:** For best results graze out paddocks and allow sward to freshen prior to application. Apply ThatchBusta™ in the early morning, late afternoon or in overcast conditions. Calibrate and clean sprayer before use.

**Compatibility:** Compatible with commonly used herbicides and nutritional sprays.

**Mixing Instructions:** Half fill the spray tank with water and while mixing slowly add the required amount of ThatchBusta™ then top up with water.
