

**μ Inoculate PP9:** Ensures the soil in your orchard is dominated by the beneficial bacteria *Pseudomonas putida*.

### DIRECTIONS FOR USE

	Rate	Timing
Soil	50 mL/ha	Apply directly to orchard floor. Minimum water rate 200L/ha

**For best results:** Add μInoculate PP9 to the tank last prior to spraying. Use slow agitation rate to mix. Apply diluted product within 8 hours of mixing. Maximum spray pressure 3 bar or 44 psi. Apply early morning or late afternoon. Can be mixed & applied with BioStart Digester, Mycorrcin, and the herbicide Glyphosate.

**Storage instructions:** Refrigerate at 4°C.

**Keep out of reach of children.** Keep away from direct sunlight. When stored appropriately, this product should show no significant degradation for 6 months from date of manufacture. Contact your supplier for further information about the use of any product that is older than this.

**Withholding Period:** Nil

**Container Disposal:** Triple rinse the container and return to an approved recycling centre.
